

Assembly Line Operator (Yeadon)

Working within a safe, well organised, and clean environment you will build electronic systems, components, and encapsulate products by following manufacturing and assembly procedures.

Key responsibilities and accountabilities:

1. Completing assemblies by fitting and adjusting parts

- a) It is vital that the work you produce is of the highest quality.
- b) Wiring and soldering components.
- c) Completing sub-assemblies.
- d) Electronics testing using automatic test equipment.
- e) Applying potting/bonding materials to encapsulate PCB's.
- f) Work towards departmental objectives and a more efficient and productive function.

2. Maintain a safe, secure and clean working environment

- a) Follow standards and procedures.
- b) Adhere to company Health & Safety policy and procedure

3. Support all other production line operatives as required

- a) Learn and understand aspects of all production areas so that your skills can be used throughout the production business.

Knowledge / Skills:

a) Essential

- (i) Team player
- (ii) Adaptable
- (iii) Soldering skills
- (iv) The ability to communicate clearly with staff at all levels

b) Desirable
